## Dual Seat Bike

Compass IL's dual-seat bike enables individuals with limited mobility, visual impairments, cognitive impairments, muscle weakness, and other challenges to enjoy the sport of cycling by allowing a second rider to assist with pedaling.

## Electric Trike

Compass IL's Electric Bike can be a valuable resource for individuals experiencing reduced strength, balance challenges, arthritis, mobility concerns, and more. It helps decrease physical strain with pedal assist, enhances stability, and features easy onboarding thanks to its low-step frame design.

## Recumbent Trike

Compass IL's recumbent trike is an excellent option for individuals with disabilities who wish to enjoy cycling. Both the steering and braking systems are hand-operated, and the trike offers high stability. It features a reclined position that provides improved back support and helps reduce strain on other areas of the body.
